

Shivani Bohra

AI/ML Engineer • Data Scientist • Software Developer

+44 7767 498324 | shivanibohra2127@gmail.com | LinkedIn | Jaipur, Rajasthan (Relocatable)

PROFESSIONAL SUMMARY

MSc Artificial Intelligence graduate (University of East London) with a strong foundation in machine learning, deep learning, data analytics, and full-stack web development. Experienced in building Python-based automation pipelines, predictive ML models, and front-end web applications. Passionate about applying AI/ML to solve real-world problems and eager to contribute to India's fast-growing tech ecosystem.

TECHNICAL SKILLS

Programming:	Python, C++, JavaScript, HTML, CSS
ML / AI:	TensorFlow, PyTorch, Scikit-learn, NLTK, spaCy, GANs, Neural Networks
Data & Analytics:	Pandas, NumPy, Matplotlib, Seaborn, Statistical Analysis, SQL
Web Development:	Node.js, jQuery, Bootstrap, Selenium WebDriver, REST APIs
Tools & Platforms:	MATLAB, Git/GitHub, Cloud Computing (basics), AWS/Azure (awareness)
Concepts:	OOP, OS, Compiler Design, DB Normalization, Machine Learning on Big Data

PROFESSIONAL EXPERIENCE

Research Assistant — AI & Data Analysis

University of East London | London, UK | Jul 2024 – Jan 2025

- Developed Python automation scripts for data collection from public sources, improving extraction efficiency by 30%.
- Analyzed survey data on youth vaping/smoking behavior using statistical methods; visualized findings with Matplotlib and Seaborn.
- Produced data-driven reports to support evidence-based research strategies, collaborating closely with a cross-functional research team.

Software Development Intern

MM International | Jamnagar, Gujarat | Dec 2021 – Feb 2023

- Led front-end development initiatives that drove a 20% uplift in user engagement.
- Maintained a 95% on-time project delivery rate through structured teamwork and sprint planning.
- Collaborated with QA testers to conduct manual testing, replicating real-world user behaviors to ensure software quality.

Summer Intern — Full Stack Web Development

Cipher MERN | Jaipur, Rajasthan | May 2020 – Jul 2020

- Built and deployed a resume builder app (HTML, CSS, JS, Node.js) and a music player app on GitHub.
- Developed an immersive interior design portfolio website, demonstrating skills in JavaScript, CSS, and UX design.
- Gained hands-on experience with version control, GitHub deployment, and building responsive web interfaces.

KEY PROJECTS

AI-Powered Resume–Job Description Matcher (Live API)

Technologies: FastAPI, Python, NLP, spaCy, PyPDF2, Render

- Built a full-stack REST API that accepts PDF resumes and job descriptions, extracts text, and computes a match score using NLP keyword matching techniques.
- Engineered structured JSON output including matched skills, job-required skills, and missing skills — providing actionable hiring insights.
- Designed a production-style modular architecture (services + utility layers) for scalability; deployed as a live API on Render.

ABC Challenge — Predictive Analytics & Generative AI

Technologies: Pandas, NumPy, Matplotlib, Seaborn, NLTK, spaCy, Scikit-learn, TensorFlow

- Applied advanced data preprocessing (cleaning, normalization) and statistical analysis to identify patterns.
- Built predictive models using ML algorithms for forecasting; communicated insights through rich visualizations.

- Implemented GANs for synthetic data generation and validation — demonstrating applied generative AI skills.

Resume Builder Web Application

Technologies: HTML, CSS, JavaScript, Node.js

- Designed and developed a structured resume builder that formats user inputs to industry standards.
- Deployed on GitHub with version control for accessibility and iterative improvement.

EDUCATION

MSc in Artificial Intelligence

University of East London, London, UK | May 2023 – Jan 2025

CGPA: 7.3/10 | Artificial Intelligence & Machine Vision, ML on Big Data, Big Data Analytics, Intelligent Systems

B.Tech in Computer Science & Engineering

JIET – Rajasthan Technical University, Jodhpur | Jul 2017 – Dec 2021

59.99% | Data Structures (C++), Computer Networks, DBMS, Operating Systems, Compiler Design
