Personal Information

Recent MSc in Artificial Intelligence graduate with a strong background in Computer Science and hands-on experience in software development and data-driven research. I bring a proven track record of enhancing user engagement through innovative front-end solutions and improving research workflows via automation and effective data analysis. Passionate about leveraging technology to solve complex problems, I excel in collaborative environments and am eager to contribute my skills in coding, data analytics, and research to drive impactful projects.

Experience

University of East London

Jul 2024- Jan 2025

Research Assistant Internship – Young People Vaping and Smoking

London, UK

- Developed Python scripts to automate data collection from public sources, increasing data extraction efficiency by 30%.
- Analyzed survey data on consumer behavior using statistical methods and visualized insights with Matplotlib and Seaborn.
- Collaborated with the research team to compile concise reports that informed data-driven strategies and project improvements.

MM International

Dec 2021- Feb 2023

Software Development Intern

Jamnagar, Gujarat

- Led front-end development, resulting in a 20% increase in user engagement
- Achieved a 95% on-time completion rate for projects through effective team collaboration.
- Collaborated with testers for manual testing, replicating user habits. Alongside QAs, ensured high-quality software meeting user expectations, contributing to overall success.

Cipher MERN

May 2020- Jul 2020

Summer Intern

Jaipur, Rajasthan

- Designed and developed a resume builder application utilizing HTML and CSS, streamlining the process of creating professional resumes.
- Developed a visually engaging interior design website using HTML, CSS, JavaScript, and NodeJs, providing an immersive showcase for the interior design firm's portfolio.
- Successfully deployed both the resume builder application and interior design website on GitHub, ensuring accessibility and version control.
- Engineered a music application using HTML, CSS, and JavaScript, offering users an interactive platform to explore and enjoy music.
- Deployed the music application on GitHub, facilitating seamless sharing and access.

Projects

ABC Challenge | Pandas, NumPy, Matplotlib, Seaborn, NLTK, spaCy, Scikit-learn, TensorFlow

- Utilized advanced data preprocessing techniques for data cleaning and normalization.
- Analyzed data attributes to identify patterns and correlations using statistical methods.
- Created visualizations using Matplotlib and Seaborn to communicate findings effectively and Developed predictive models using machine learning algorithms for forecasting.
- Implemented generative AI techniques like GANs for synthetic data generation and validation.

Resume Builder | HTML, CSS, JavaScript, Node.js

- Develops a meticulously structured resume that adheres to industry-specific formatting guidelines, incorporating the information provided by the user.

Technical Skills

Languages: Python, C++, HTML, CSS and JavaScript

Technologies: TensorFlow, PyTorch, jQuery, Bootstrap, Node.js, Selenium WebDriver, MATLAB

Concepts: Compiler, Operating System, Virtual Memory, Cache Memory, Object -Oriented Programming (OOP), Artificial Intelligence, Machine Learning, Neural Networks, API, Database Normalization, Cloud Computing

Education

University of East London

May 2023 - Jan 2025

MSc. in Artificial Intelligence (CGPA: 7.3/10)

London, UK

- **Relevant Coursework:** Artificial Intelligence & Machine Vision, Machine Learning on Big Data, Big Data Analytics, Intelligence Systems

JIET-College of Engineering(Rajasthan Technical University)

Jul 2017 - Dec 2021

Bachelor of Technology in Computer Science & Engineering (Percentage:59.99%)

Jodhpur, Rajasthan

- **Relevant Coursework:** Data Structures and Algorithms (C++), Computer Networks, Database Management System, Operating System and Compiler Design
